

# VINCI COMPLIANCE

*Deborah Eddy, Audit Program Manager*

VA Informatics &  
Computing  
Infrastructure

# What will we cover today?

- Role of the VINCI Compliance Team
- Operations vs Research studies
- The HIPAA rule

What is a patient identifier

What are de-identified data

- What are aggregated data
- PII vs PHI
- The VINCI File Transfer Utility
- Common Pitfalls and Risky behavior
- Most important takeaways

# Poll Question #1

What is your primary role in VA research (select one)?

- Principal Investigator
- Study Coordinator/admin support
- Statistician/Programmer
- Other Support
- I work on Operations studies only
- None of the above

# Poll Question #2

What is your experience level with VINCI?

- I have no or minimal experience with the VINCI workspace.
- I've been a VINCI user for 1-3 years
- I've been a VINCI user for 4 or more years.

# Compliance Team roles

Help VINCI customers stay in compliance with Federal and VA regulations regarding the storage and use of patient data.

Provide education and other support to the VINCI community.

Protect patient data by ensuring they are only removed from VINCI with permission of the data steward. VINCI downloads are reviewed for compliance.

# Research vs Operations Projects Resources

**VA HSR&D Cyberseminar 11/2/2020 “Requesting Access to VA Data”**

by Linda Kok, VIREC (VA Information Resource Center) Senior Analyst for  
Data Access and Policy

[https://www.hsrd.research.va.gov/for\\_researchers/cyber\\_seminars/archives/video\\_archive.cfm?SessionID=3882&Seriesid=22](https://www.hsrd.research.va.gov/for_researchers/cyber_seminars/archives/video_archive.cfm?SessionID=3882&Seriesid=22)

**VHA Data Portal**

<https://vaww.vhadatportal.med.va.gov/DataAccess/VINCIWorkspaceRequestProcess.aspx> (includes link to Research vs Operations Decision Tool)

# Compliance Considerations: Operations vs Research projects

Operations projects (e.g., Healthcare Quality Assessments, Operational Reporting, Program Evaluation, Forecasting and Financial Auditing projects)

- Researchers use the **NDS Healthcare Operations Request Process** [Healthcare Operations Request Process \(va.gov\)](#) to obtain access to identifiable patient data.
- An operations program manager may place restrictions on the removal of patient data from the VINCI workspace.

Research projects including Prep-to-Research studies (to aid in the preparation of a research protocol), IRB studies and IRB-exempt studies

- Researchers use the DART (Data Access Request Tracker) application to request access to identifiable patient data and specify data storage locations (VINCI, local VA server, outside entities).
- Once the DART application is approved, VINCI will create a project folder for the study and a Data Manager will provide views to the data.
- An email will be sent to the submitter's VA email address confirming approval and providing a link to the study correspondence site (the method of communicating with the Data Manager).

## Research projects – special considerations

- Patient-level data may only be downloaded from VINCI with the express approval of the data steward. Data provisioned for Prep-to-Research studies may never be downloaded from VINCI.
- Always work with the VINCI Data Manager to access data for which you have been approved.
- A study team member may not use his/her operations access to view or pull data for a research project UNLESS all regulatory permissions have been approved. Data approved for one research project may not be reused for another research project UNLESS all regulatory permissions have been approved. Further guidance can be provided by the VINCI Compliance team and VIREC.

## Research projects – downloading aggregate data and statistics

In general, statistical output and aggregate data for research projects may be downloaded from VINCI to a local VA server. HOWEVER...

- The Files created by executing Statistical programs might include patient-level data (e.g., original dataset, tables, min/max values) which may not be downloaded from VINCI without express permission of the data steward.
- Aggregated data must include counts for multiple patients. Counts provided on the patient level are not considered aggregated data.
- The National Data Systems Office has established numerical thresholds that must be met for data to be considered “Aggregated”:

# Definition of Aggregate Data

The National Data Systems Office (NDS) has determined that data counts must meet the following thresholds in order to make reidentification of individuals extremely difficult:

- A count of patients where no HIPAA identifiers exist (e.g., a count of the number of patients seen in VA hospitals in 2003) may be as low as 3.
- A count of patients where HIPAA identifiers other than those related to location are included (e.g., a count of patients aged 90 and up seen in VA hospitals in 2003) may be as low as 11.
- A count of patients where HIPAA identifiers related to location are included (e.g., a count of patients aged 90 and up in Broward county) may not be lower than 21.

# Patient Identifiers

- PII (Personally Identifying Information) is any information about an individual that can be used to determine an individual's identity.  
Examples: Name, SSN, Address, Date of Birth.
- PHI (Protected Health Information) refers to data about health status, provision of health care, or payment of health care that can be linked to a specific individual.  
Examples: Billing information, lab results, appointment information.

# De-Identified Data

- VINCI does not provide de-identified data.
- The HIPAA rule and Appendix A of VHA Directive 1605.01 (Privacy and Release of Information) address the de-identification of data. VHA Directive 1605.01 is the policy that combines the requirements of the Privacy Act and HIPAA Privacy Rule and the other VA statutes in one place so that disclosures can be made with the appropriate legal authority.
- Data are considered to be sufficiently de-identified if either the Safe Harbor method or the Expert Determination method have been applied.
- For either technique, VINCI will help you obtain the necessary approvals to release patient-level data. Aggregated data are only considered to be sufficiently de-identified if the counts meet thresholds set forth by the National Data Systems Office.

# The HIPAA Rule

- The following identifiers of an individual, an individual's relatives, household members or employers may not be disclosed:
- 1. Names
- 2. All geographic subdivisions smaller than a State, including street address, city, county, precinct, zip code, and their equivalent geocodes, except for the initial three digits of a zip code if, according to the current publicly available data from the Bureau of the Census:
  - a. The geographic unit formed by combining all zip codes with the same three initial digits contains more than 20,000 people; and
  - b. The initial three digits of a zip code for all such geographic units containing 20,000 or fewer people is changed to 000.

# HIPAA identifiers, cont.

- 3. All elements of dates (except year) for dates directly related to an individual, including birth date, admission date, discharge date, date of death; and all ages over 89 and all elements of dates (including year) indicative of such age, except that such ages and elements may be aggregated into a single category of age 90 or older.
- 4. Telephone numbers
- 5. Fax numbers
- 6. Electronic mail addresses
- 7. Social security numbers

# HIPAA identifiers, cont.

- 8. Medical record numbers
- 9. Health plan beneficiary numbers
- 10. Account numbers
- 11. Certificate and/or license numbers
- 12. Vehicle identifiers and serial numbers, including license plate numbers
- 13. Device identifiers and serial numbers
- 14. Web Universal Resource Locators (URLs)
- 15. Internet Protocol (IP) address numbers
- 16. Biometric identifiers, including finger and voice prints

# HIPAA Identifiers, cont.

- 17. Full-face photographic images and any comparable images
- 18. Any other unique identifying number, characteristic, or code.  
Study-generated identifiers may be utilized but may not be based on the SSN or other identifiers listed here. NOTE: Scrambling of names and social security numbers is not considered a valid de-identification method.

# VINCI File Transfer utility

## **Purposes:**

To upload locally collected data for analysis

To download statistical output for publication or presentation

and, IF PERMITTED BY THE DATA STEWARD:

To download patient-level data for approved purposes, e.g., for recruitment or to use as a finder file.

# Data Steward permissions

DART (Data Access Request Tracker)

- method for requesting access to data for a research study
- specifies who may access the data (P.I. must ensure this is kept current)
- documents where the data will be stored

VINCI

Local VA server

or both

and whether they will be shared external to the VA

See DART User Guide (<https://vaww.vinci.med.va.gov/vincicentral/>)  
for information and instructions

# DART - Checking download permissions

## Data Sources screen

### Data Sources

Data Storage Location \*

- VINCI
- Other Server Location

Will data be transferred external to the VHA? \*

*Currently CDW cannot approve a research request that would include disclosing the CDW data (identifiable or de-identified) outside of VHA without a signed research consent and HIPAA authorization from the individual because of the risk of re-identification. The data may be used (internally or within VHA) for the approved protocol. If "finder" files are to be sent out to Federal or state agencies for the purpose of the Federal or state agency disclosing information on the individual back to VA per SOR 34VA12, a DUA between the PI and the external agency must be submitted with the DART application.*

- No
- Yes (DUA is required)

# DART - Checking download permissions Research Request Memo (Documents screen)

**Department of Veterans Affairs**

**Memorandum**

Date:

From: Principal Investigator

Subj: Research Data Request Memo for:

To: Director, National Data Systems

The following information is required and all signatures must be obtained before any review of this request can take place:

Are all participants requesting access a VA employees or WOC employees?  Yes  No

Is this request for data use for a VA research study (includes pilot studies)?  Yes  No

Is this request for activities preparatory to research?  Yes  No

Select the type(s) of data needed:  Real SSN  Scrambled SSN  PHI but No SSN

Is access to CAPRI / JLV being requested?  Yes  No

Is access to VSSC and/or MCA Web Reports being requested?  Yes  No

Will any requested data be transferred outside of the VA?  Yes  No

Will the data be stored in the VINCI Environment?  Yes  No  Both

A. Please describe the data you are requesting. The data requested must reflect data discussed in the protocol or HIPAA waiver if applicable and selected in DART.

B. Provide a high level summary of how the requested data will be used in the research study.

C. If Real SSN access is requested, please provide a justification.

D. List the participants names and whether they are VA Employee, Contractor, or Without Compensation (WOC).

## Upload Files

### Helpful Tips

Files containing patient information can only be uploaded to project folders.  
Maximum file size limit is 2 GB. For uploads exceeding 2 GB, please email [vinci@va.gov](mailto:vinci@va.gov). Please compress (Zip) your files before uploading.

### Step 1: Choose a Folder Destination

Select the folder you want to upload to, then drag your files into the upload window or click the Browse Files button below. Don't see one of your folders? Try refreshing the page. If you're still having trouble, please contact [vinci@va.gov](mailto:vinci@va.gov).

Select your upload destination 

- H:\Upload
- O:\vinci\_services\Upload
- O:\vincidbdev\Upload
- P:\vinci\_auditors\Upload

# Prior to download...

- Make sure you know the exact name of the file you wish to download and its location on VINCI
- Ensure you are mapped to the local VA server destination
- If you intend to download multiple files, you may wish to first zip them up on VINCI, so they can all be downloaded at the same time

# Avoid these Common pitfalls

- File transfer utility mistakes (accidental downloads, downloading to unapproved location)
- Storing patient data in VINCI Home Drive
- Aggregate data do not meet NDS threshold requirements
- Data aggregated by age do not meet HIPAA requirements
- PatientIDs such as PatientICN, ScrSSN downloaded without approval
- Dates such as Visit Dates, Dates of Admission/Discharge, dx dates downloaded without approval
- Screen shots with Patient Identifiers downloaded without approval
- Statistical output includes patient-level data or displays min/max values of identifiers
- Excel workbooks with multiple sheets not checked thoroughly
- Files created by another team member not checked prior to downloading
- Finder files or recruitment lists not approved through DART
- Code looks for particular patient IDs or includes identifiers in comments
- Using operations access to view/pull data for a research study without regulatory permissions

# Risky Behavior

- Use of non-VA email for official business
  - Justified only if unavoidable
  - Convenience is not a justification
  - Can result in team missing important notifications
- Sharing patient data via VA email
  - Not considered a best practice even when encrypted
  - Requires permission of the study PI
- Sharing patient data via Teams
  - Not considered a best practice
  - Requires permission of the study PI
- The PI is responsible for the security of study data

# TIPS for Staying in Compliance

- **REMEMBER** - data permissions are granted on a study by study basis. Operations data may not be used for a research study UNLESS all regulatory permissions have been approved. Data for one research study may not be shared with another study UNLESS all regulatory permissions have been approved. Further guidance can be provided by the VINCI Compliance team and VIREC.
- **READ** – if you are considering removing data from VINCI, stop and review the study's DART documentation. The DART application describes exactly where your data is to be stored. If you do not have access to DART, please consult with your P.I. or Study Coordinator. Also read the VINCI File Transfer Guide to avoid pitfalls.

# More Tips!

- **REVIEW** – VHA Directive 1605.01 for a description of identifiable data and the HIPAA rule.
- **REMIND** – your team that they are each responsible for ensuring (1) only data permitted by the data steward may be downloaded from VINCI and (2) the data are downloaded to your local secure server.
- **REACH OUT** – contact the VINCI Compliance team if ever in doubt on whether study data may be downloaded from VINCI.
