Verily Health Platforms Fellowship Program 2021-2022

Background

Verily, an Alphabet company, lives at the intersection of technology, data science and healthcare. Our mission is to make the world's health data useful so that people enjoy longer and healthier lives. We are developing tools and devices to collect, organize and activate health. The Verily Health Platforms (VHP) organization focuses on care delivery innovation. Our data-driven solutions include programs like Onduo, our personalized virtual care platform, which includes connected tools, lifestyle coaching and clinical support; Verily Value Suite, a platform of tools for health systems and medical groups to lower costs of care and improve outcomes, that includes a strong focus on surgical and perioperative care; and Healthy at Work, a COVID-19 response make going back to work and school safer by combining testing, symptom tracking, data analytics, and the latest guidance from the CDC and other public health authorities.

Description

As one of the inaugural Verily Health Platforms fellows, you will be a trusted member of the cross functional leadership team, joining in the Summer of 2021 and working full time as a paid contractor for one year. Working with our diverse product, clinical, data science, and central teams, you will be responsible for planning, designing, and implementing evidence generation programs, assessing existing projects, and helping to develop other thought leadership publications. You will contribute to the development of digital health technology products as well as help draft manuscripts and abstracts for peer reviewed publication submissions and scientific conferences.

Responsibilities

- Contribute to the development of digital health technology products and platforms
- Apply broad knowledge of study design, statistical and data science methodologies to support evidence generation program development
- Assess existing projects and programs for impact on health, costs of care, and access and equity
- Lead the writing of manuscripts and abstracts for submission to peer reviewed journals and scientific conferences

Qualifications

- Currently engaged in post-graduate medical or nursing training (residency/fellowship) or current/recently completed graduate program (ex: PhD, MBA, MPH, MHA, or similar)
  - Direct experience in health services research, statistics, quality improvement, health economics, or related fields

- Proven track record of successful academic/scientific writing and preparing and submitting manuscripts and abstracts to peer reviewed journals and conferences

Application Process

- Send your resume, cover letter, and work samples (including publications and other examples of evidence generation capabilities) to daniellesample@verily.com
- The deadline to apply is April 15, 2021.
- To be considered, all applications must meet the minimum requirements of a proven track record of successful research and publication.
