Recent News from OCC and the VC CORE

Year 2 VC CORE Needs Assessment
Last year, many of you completed the CORE’s Baseline Needs Assessment Survey. The feedback we received was extremely useful to our ability to plan relevant programming and proactively reach out to members who had indicated interests in various topics. We now ask all VC CORE Members to complete the Year 2 survey to help us assess how we’ve done in the past year, determine how the attitudes and preferences among members have changed, and plan the most useful programming for members in year 2 of the VC CORE. The survey takes approximately 20 minutes to complete and is live here.

Developing Telehealth Reporting Standards via Modified Delphi Process
Researchers at the Durham VA COIN are working to develop a set of Telehealth Reporting Standards. The recent Evidence Synthesis Program report on the use of virtual care for the longitudinal management of chronic conditions highlighted the need to improve reporting in telehealth research such that interventions can be appropriately compared and successful ones be implemented. Researchers and other stakeholders interested in participating may attend a brief meeting (date TBD) outlining the Modified Delphi process for the project and then provide feedback on a set of proposed standards asynchronously via REDCap, and can email conor.walsh@va.gov to get involved.

Congressional Request on Value of Virtual Care
VA's Office of Connected Care has received a request from Congress to respond to two questions about how VA evaluates the cost, quality, and outcomes-based value of telehealth (i.e., all virtual care services in use in the VA health system). They are seeking any relevant published or ongoing work for the two questions below:

1. Does the VA have cost, quality, and outcome-based thresholds it uses when determining whether or not a telehealth service is beneficial relative to when the same service is performed in a traditional health care setting? If so, please share information pertaining to aforementioned cost, quality and outcome based data metrics.
2. Does the VA perform contemporaneous and retroactive analyses of cost, quality, and outcomes for each service furnished via telehealth compared to when such services are furnished in a traditional setting? If so, please share such analyses for each service covered when furnished via telehealth.

For these two questions, we are reaching out to the VC CORE Network to share:
- Any published papers (citation and pdf)
- Any relevant ongoing work, with point of contact (email) and expected date when findings will be available.

Many thanks to those who have reached out already! Any others who wish to provide evidence, please send relevant materials to VCCORETeam@VA.gov by COB on Monday 12/6/21.

VC CORE Network Update and Open Forum
The Virtual Care CORE will be hosting a network-wide meeting on December 6th from 3:00 PM - 4:00 PM EST. This call will be open to all members and will include updates on current and planned activities for the CORE, but we will use audience participation tools for idea generation and would like to dedicate as much time as possible to agenda items our members recommend and/or a Town Hall style open forum for feedback and new ideas. Join using any of the methods below, but using video will give you the best access to our interactive tools.

Apply to use the Women’s Health PBRN for Relevant Grants!
The VA Women's Health Practice Based Research Network (PBRN) PBRN is a partnership of 73 VA facilities nationally, representing over half of women Veterans who use VA. If you are planning to submit a proposal to VA HSR&D in December 2021, consider applying to use the PBRN if multi-site study is needed, either to address the research question, to achieve representativeness, or to recruit sufficient numbers of women; the study approach requires direct contact with subjects; and if the study examines women's health issues or compares women to men.

Send an email to the PBRN Coordinating Center with an explanation of the type of grant you are submitting (e.g., VA HSR&D IIR), deadline for your grant submission, and a few sentences describing your study to susan.frayne@va.gov & diane.carney@va.gov. At least two months prior to your planned grant submission deadline.

Recent Virtual Care Publications
- No new publications submitted this month. Check back again in January!
### Upcoming Meetings and Cyberseminars
