Office of Health Equity

SESSION OUTLINE

Introduction

- Background & Sec VA Priorities
- VA Health Equity Action Plan & Innovation

Virtual Medical Center

- Overview
- Flipped Classroom Methodologies in VA

The Health Equity Learning Hub

Discussion with Q &A

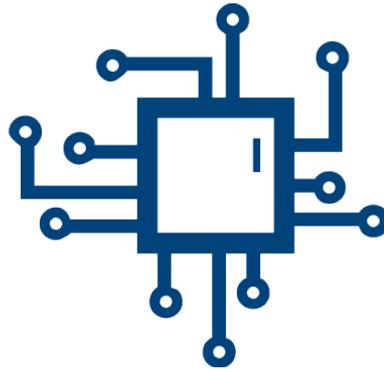

TOP 5 PRIORITIES – SEC VA Dr. David Shulkin

Greater Choice

Modernize Systems

Efficiency

Improve Timeliness

Suicide Prevention

Veterans Health Administration
Office of Health Equity

VA HEALTH EQUITY ACTION PLAN - HEAP

OHE along with key partners developed the HEAP which Aligns with Sec VA Priorities, My VA, the VHA Strategic Plan (see Objective 1E Quality & Equity), and other agency and national strategic goals. The HEAP focal areas are

- ❑ **Awareness:** Crucial strategic partnerships within and outside VA
- ❑ **Leadership:** Health equity impact assessed for all policies, executive decision memos, handbooks, procedures, directives, action plans and National Leadership Council decisions
- ❑ **Health System Life Experience:** Incorporate social determinants of health in personalized health plan
- ❑ **Cultural and Linguistic Competency:** Education & training on health equity, cultural competency to include unconscious bias, micro inequities, diversity & inclusion
- ❑ **Data, Research and Evaluation:** Develop common definitions and measures of disparities and inequities; Develop strategies for capturing data on race, ethnicity, language, and socioeconomic status and other variables needed to stratify the results for all quality measures and to address disparities; Incorporate health equity into Strategic Analytics for Improvement and Learning (SAIL)

Veterans Health Administration
Office of Health Equity

SEC VA PRIORITIES & HEALTH EQUITY

Greater Choice

- Consider any disparate impact on vulnerable Veteran populations.
- Empower Veterans through transparency of information

Improve Timelines

- Consider any disparate impact on vulnerable Veteran populations.

Suicide Prevention

- Apply equity lens to 2016 suicide mortality report to inform culturally appropriate and tailored prevention strategies for vulnerable Veteran populations as appropriate. More details in the FHEA 07.17.2017 Archive

Accountability /Efficiency

- Implement Commission on Care Recommendation #5 – Eliminate Health Disparities among Veterans: Make Health Equity a Strategic Priority by Implementing the HEAP.
- Data transparency by assessing any disparate impact and making data on vulnerable Veterans publicly available.
- Go beyond collecting and analyzing disparities to actually addressing them in order to diminish or eliminate the gaps

Modernization

- Embed HEAP implementation into foundational services.
- Incorporate social determinants of health in the new EHR with connection to DoD & actionable data for vulnerable groups.
- Consider disparate impact of appeals on the vulnerable.
- Develop partnerships with community organizations to improve health equity.

OHE LEVERAGING TECHNOLOGIES

Modalities Applied by OHE in Projects:

- Publications with open access & Presentations in multiple formats
- Data Visualization
 - Dashboards - Hepatitis C Virus Disparities
 - Data Story - National Veteran Health Equity Report
- Virtual Patient Health Equity Modules
 - Simulation Platform
 - Application of Stories
- Video – Messaging & Products
 - Clinical Look at Unconscious Bias
 - Journeys with High Blood Pressure
- Cyberseminar
- Reports including e-Pub
- Website & Listserv
- Virtual Medical Center - Health Equity Learning Hub**

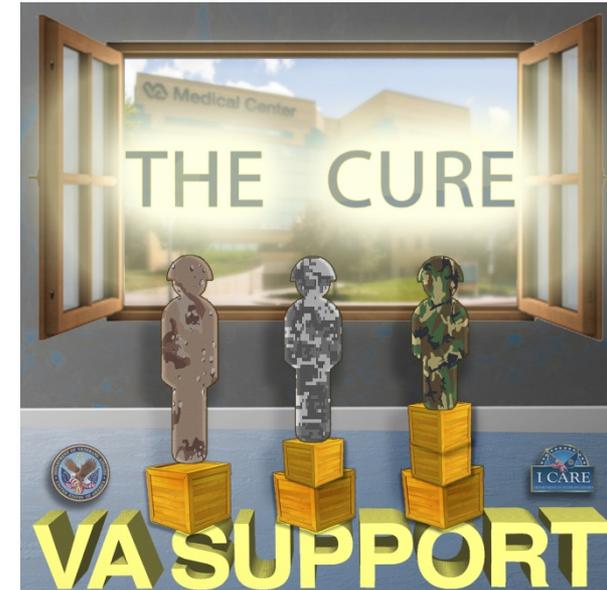

Veterans Health Administration
Office of Health Equity

VIRTUAL SIMULATION – HEALTH EQUITY TRAINING MODULES

- ❑ Vulnerable Veterans may experience differences in their health and healthcare
- ❑ There may be health disparities associated with social or economic disadvantages
- ❑ Two key Virtual Patient Modules developed with goals of increasing competence for all employees and how providers, in particular, can solicit impact of social determinants of health and incorporate interventions in their care plans
- ❑ Maximize use of technology to impart knowledge and skills in a realistic decision making simulation

Veterans Health Administration
Office of Health Equity

Poll Question 1

FHEA 09.28. 2017

Veterans Health Administration
Office of Health Equity

YOUR INPUT REQUIRED... POLL Q1

- What novel technologies do you recommend for advancing health equity?

- Write your response in the chat box

Veterans Health Administration
Office of Health Equity

VHA PRIORITIES IN ACTION

- ❑ The 2014 VHA Blueprint for Excellence emphasized personalized, proactive patient-driven care and the empowerment of Veterans to improve their well-being
- ❑ Current priorities actualize proactive care and empowerment through greater choice, modern systems, efficiency, timeliness, and suicide prevention
- ❑ The VA Virtual Medical Center, a novel virtual collaborative care and learning environment, is ideally positioned to support these priorities at local, regional and national levels
- ❑ It has the potential to eliminate barriers to access, increasing Veterans' literacy and cultivate patient engagement

Veterans Health Administration
Office of Health Equity

CONNECTING IN A VIRTUAL WORLD

- ❑ Central to the experience is presence, generally conceptualized as psychological and sensorial immersion
- ❑ Presence is the perceptual illusion of non-mediation - the feeling of the virtual being real and no longer mediated
- ❑ This is possible due to human's extended consciousness which allows one to suspend disbelief and experience the virtual as a possible reality

THE AVATAR – A MIRROR VERSION OF SELF

- ❑ The avatar is a simulated extension of self that may influence one's feelings about the self, views of the world, and behaviors, both on and off- line.
- ❑ One's offline self is not separate, then, from one's online identity; rather, the virtual converges with the offline.
- ❑ This phenomena can influence and initiate change in offline body-related behaviors.

VMC STRATEGIES TO INCREASE ACCESS AND OPERATIONALIZE PRIORITIES

- Relieving the healthcare team of repetitive tasks
- Automating tasks that Veterans can complete
- Expanding Shared Medical Appointments

- Providing consultations and care
- Health Coach-Led and Peer Support Groups

- Transforming Veteran education to a Flipped Classroom Model with asynchronous individual learning and interactive sessions with staff

- Avatars can answer FAQs saving health care team time which can be redirected to others

- Empowering Veterans to self-manage their health, decrease ER visits/readmissions, and increase well-being

PILOT PROJECTS

- ❑ Principles of clinical implementation of the VMC are being tested with our pilot projects
- ❑ Each pilot focuses on a key clinical issue with unmet needs and interventions synergistic with current care
- ❑ The interventions include provider-facing, patient-facing and provider-patient interaction components

Targeted Clinical Issues

- ▶ Diabetes
- ▶ Heart Failure
- ▶ Weight Management
- ▶ Palliative Care
- ▶ Sleep
- ▶ 1st Clinic Visit
- ▶ GI Procedures

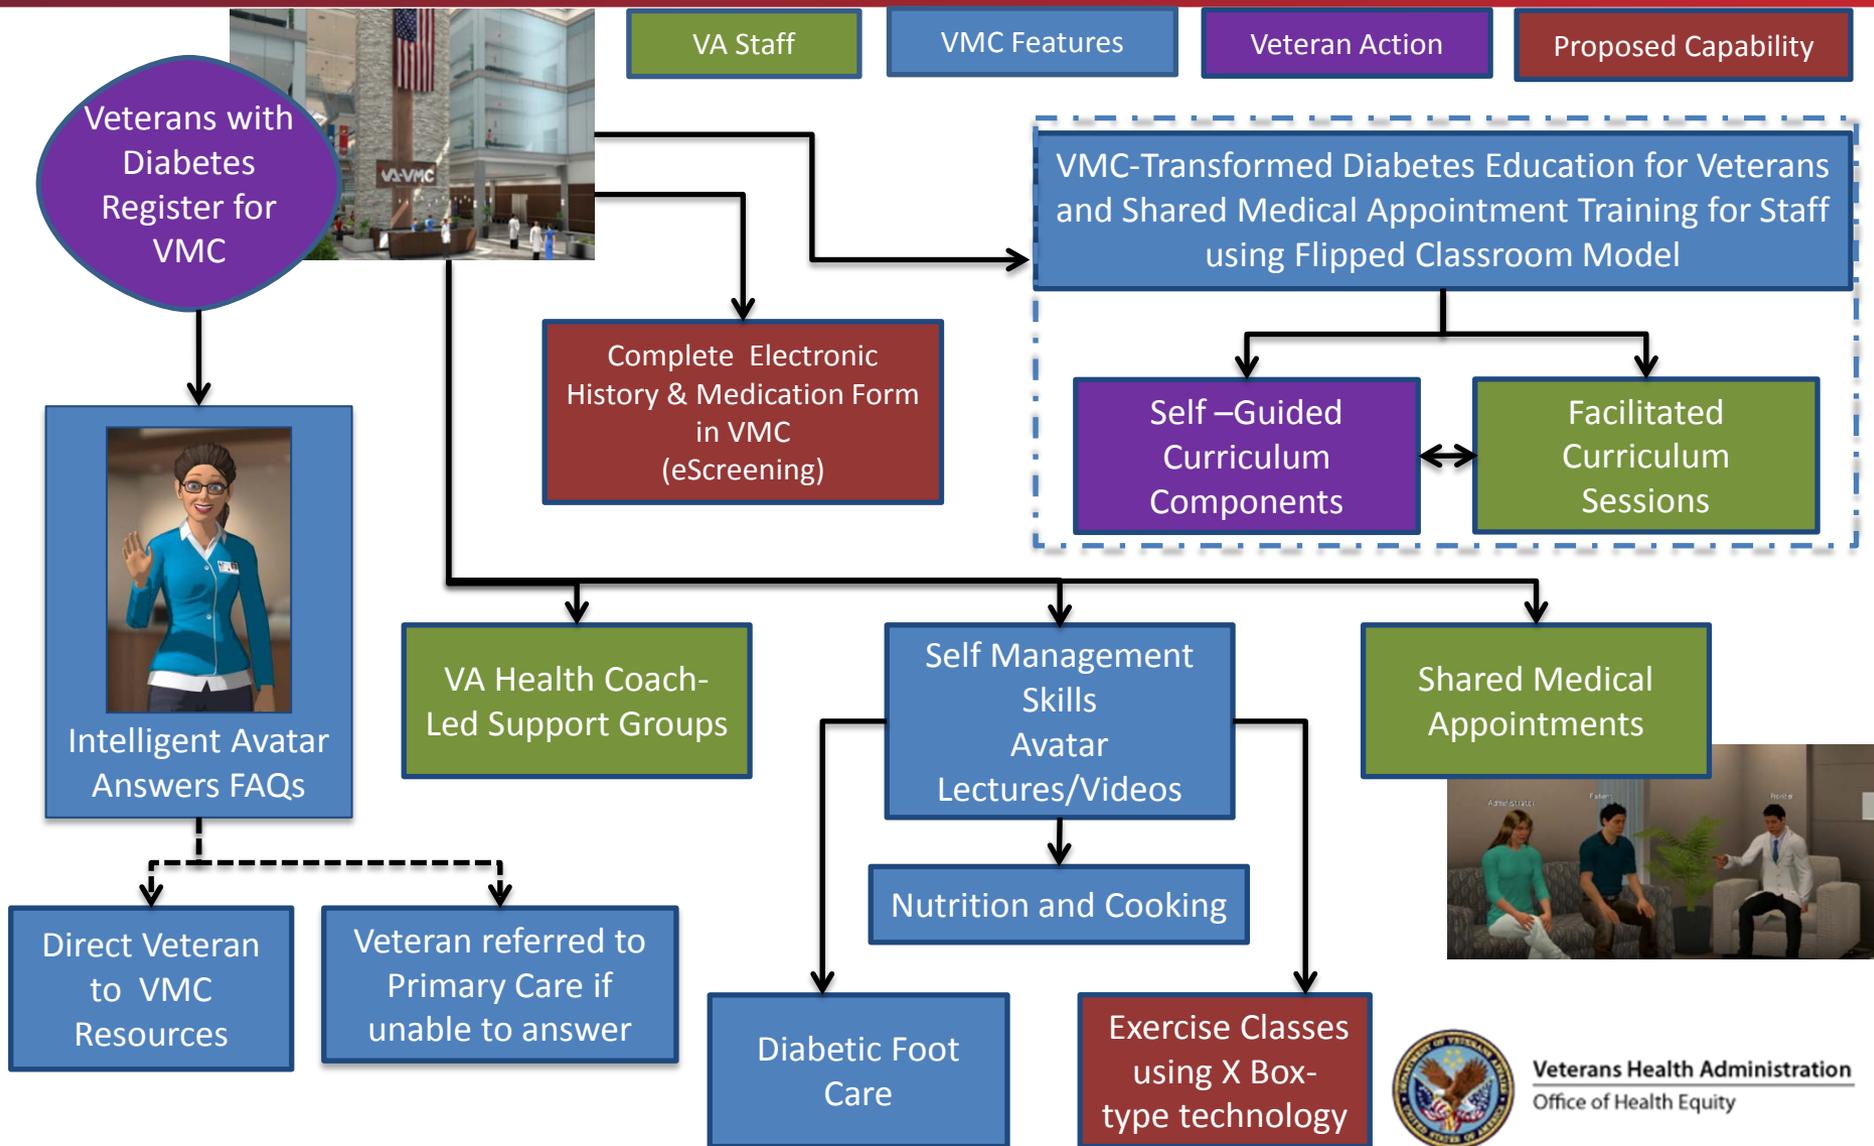

DIABETES CARE

- ❑ More than 25% of Veterans are diabetic
- ❑ Diabetics must actively manage their health behaviors to minimize disease-related complications and mortality
- ❑ More than 45,000 new appointments are scheduled for Diabetes Clinics annually
- ❑ Although Diabetes Education Classes are a cornerstone of management, fewer than 20% of Veterans with diabetes attend classes
- ❑ One-on-one care is effectively supplemented with multidisciplinary Shared Medical Appointments

VMC INCREASING ACCESS TO DIABETES CARE

Veterans Health Administration
Office of Health Equity

USING FLIPPED STRATEGIES FOR VETERAN & STAFF EDUCATION

Flipping Bloom!!!

Why did we try?
How do you do it??
Is it worth doing???

Veterans Health Administration
Office of Health Equity

THE SAGE ON THE STAGE VS. THE GUIDE ON THE SIDE

❑ The Sage – The Transmittal Model

- Students are empty vessels into which the professor pours knowledge
- Not effective when individuals are expected to think for themselves

❑ The Guide – Constructivist Theory of Learning

- Students use their existing knowledge and prior experience to help them understand new material
- Information is actively processed in new and meaningful ways

WHY FLIP BLOOM?

To support learners in achieving
a higher level of the taxonomy domain

At Home

In Class

In Class

At Home

Veterans Health Administration
Office of Health Equity

THE BIG DIFFERENCE

❑ Traditional Lectures

- Students' attention decreases after ten minutes and after an average of 15 to 20 minutes is almost fully lost
- Students are practicing new concepts outside of class with limited access to instructor

❑ Flipped Strategy

- In class students engage in interactive learning activities involving collaborative and problem-based learning tasks to develop higher order thinking skills
- Out of class students access didactic material through videos, audios, content-rich websites, and other resources

TRADITIONAL VS. FLIPPED CLASSROOM TOOLS

Level of Learning	Traditional Tools	Flipped Tools
Remembering	Face-to-face lecture	Pre-recorded lectures, readings, serious medical games, VP cases and videos
Understanding	Q and A	Reflection, peer discussion and collaboration
Analyzing	Homework	Classroom activities
Applying, Evaluating, Creating	Homework or nothing	Learner projects, e.g. creating a meal plan, iterative feedback

IMPACT OF VMC ON ACCESS TO DIABETES CARE

- ❑ Shared Medical Appointments and Health Coach-Led Support Groups increase compliance and provide support for diabetics beyond what is possible when caring for other challenging medical conditions during Primary Care appointments
- ❑ Converting the standard diabetes education to a VMC Flipped Classroom Model can save 75% of facilitator time
 - Synchronous facilitated interactive sessions
 - Asynchronous self-guided activities available 24/7
- ❑ Scheduled evening activities would increase access for working, rural, student and disabled Veterans
- ❑ Resources for lifestyle modification, medication and exercise promote Veteran empowerment to manage their disease, improve their well-being and decrease need for provider visits

GALLERY WALK EVENT @ SLBM APRIL 2017

The intended outcomes were to:

- *Raise awareness of VA health equity efforts including the development of the agency's strategic roadmap to achieve health equity for all Veterans (VA Health Equity Action Plan);*
- *Highlight Veteran and employee tools and reports aimed to improve cultural competency, understanding of health equity concepts, and awareness of best and promising practices for improving the health of vulnerable Veterans and their families*
 - ❑ *Virtual Patient Health Equity Trainings Modules*
 - ❑ *Patient Narrative Videos*
 - ❑ *National Veteran Health Equity Report*
 - ❑ *Focus on Health Equity and Action Cyberseminar Series*
 - ❑ *Health Equity Tools, Website and Listserv*
- *Engage and explore with senior leaders commitments to identify, target, and/or implement best and promising practices locally to achieve health equity for Veterans; and*
- *Support existing or anticipated activities at the VAMC to advance health equity for all Veterans especially the most vulnerable.*

Veterans Health Administration
Office of Health Equity

GALLERY WALK: TOP THEMES - FEEDBACK

Theme	How to Accomplish
Receive additional information and training for Veteran health equity issues	 OHE Website & VA Virtual Medical Center Health Equity Hub
Implement existing health equity tools at VAMC for Veterans and staff (e.g., Journeys with High Blood Pressure Videos and Virtual Patient Health Equity Training Modules)	 OHE – Follow-up with Voluntary facility/VISN participation
Partner with VA Office of Health Equity to explore data (e.g., racial/ethnic disparities related to quality measures)	OHE is exploring options to provide requested support
Development of additional tools and data analytical approaches/displays to explore and address disparities at the VAMC level	OHE as lead but requires enterprise coordination

 Examples of needs that can be met with the VA VMC Health Equity Hub

Veterans Health Administration
Office of Health Equity

Veterans' Stories

HEALTH EQUITY - TAKE ACTION

- ❑ **Consistently report, monitor, trend, and track key metrics along vulnerability lines to include gender/sex, race/ethnicity, rural/urban, military era/period of service, etc.**
 - **Doing so will allow transparent monitoring of the progress for the vulnerable groups, support the accountability agency priority and bolster trust**
 - **Develop *Innovative Health Equity Projects* to tackle issues identified**

- ***The pursuit of Health Equity should be everyone's business.***
- ***It is a journey that takes time and sustained effort.***
- ***What can you do today in your area of influence to improve health equity?***
- ***At a minimum - in all your actions - do not increase the Disparity.***
